## Cost Management/Print Tracking

Copiers Northwest has solutions that will deliver complete visibility and control of your print environment. All users, groups, rules, security permissions and cost centers are centrally managed and bundled into one system.

Benefit from a powerful single workflow solution for office printing, document scanning, mobile printing, device management, and production printing. View all your costs and client billing information clearly in one report. Eliminate time spent on manual reporting tasks.

Document Management Systems (DMS) · Scanning & Imaging Technology · Intelligent Routing · Enterprise Content Management (ECM) · OCR Data Capture · Forms Processing

Capture & Workflow Integration

Document capture and scanning is a challenge in any organization. Our solutions will streamline all your the document handling needs such as document scanning, forms processing, OCR data capture, and intelligent routing, to name a few.

CNW brings cutting edge imaging technology to the workplace, with a focus on document automation and efficiency, while optimizing the capacity of any scanning device. These solutions can provide an onramp to many Enterprise Content Management (ECM) systems, online storage and retrieval services or integration with your accounting software.

Electronic Content Management (ECM)

Content drives every company function — from people to systems to processes — but can be difficult to secure across different tools. ECM platforms can act as a single, secure content layer to manage your sensitive data, so your team can spend more time simply getting work done.

Eliminating paper opens the floodgates to innovation. By reducing paper, reducing storage and reducing the risk of document loss, you build a foundation for your digital roadmap. From digitizing documents to transforming processes, Copiers Northwest can provide a framework for organizations looking to embrace the benefits of workplace technology.

COPIERS NORTHWEST
New Ideas. New Solutions.

Copiers Northwest's Integrated Solutions Group (ISG) is committed to helping your operations become more automated, productive and enhance your workflow solutions.

INTEGRATED SOLUTIONS GROUP

Document Preparation

Whether you are working with PDFs, scanned images, or pages from digital sources, Copiers Northwest has solutions for enhancing documents, assigning media attributes, creating inserts or tabs, and optimizing image color brightness and saturation.

We can streamline your processes from start to finish and enhance your workplace with feature-rich options like productive scanning, word processor-like editing, cloud and document management connectivity, and PDF security.

Production Print Management

Copiers Northwest offers industry-leading make-ready software featuring expanded job assembly and automated prepress applications. We can integrate with job submission, control and automate workflows, route jobs, and manage output.

This gives you the power to centrally manage and route all print jobs to a wide range of destinations such as production printers, office printers, archival systems, and email, or submit into an external prepress and workflow application.

Fax Solutions

Many employees are working remotely, from home, or from branch locations. IT managers are challenged with assessing their aging fax infrastructure and adapting to a modern work environment where secure document transfers are part of a complex business process.

Fax Servers add a digital component to the faxing world by allowing us to fax directly to email, specify routing methods, and overcome security and compliance issues. Many organizations have now embraced the next step in fax evolution and have pushed faxing into our secure Cloud Fax platform.

COPIERS NORTHWEST
New Ideas. New Solutions.

Now is the time to automate your business practices. Our ISG team will take time to find out exactly how we can help with customized workflow solutions just for you!
