

# Education

**Our docustudy will give you better printing & copying solutions!**

## Controlled Costs and Reliable Equipment is Mandatory

**Copiers Northwest** has 35 years of experience working with school districts of all sizes and universities, both public and private, throughout Washington and Oregon. Our representatives understand the nuances associated with the education environment. Costs need to be controlled and reliable equipment is mandatory. A down copier or printer can have a negative impact on morale. Teachers have to alter lesson plans, memos aren't distributed and correspondence with students and parents is delayed. As one of the USA's premier office technology providers, Copiers Northwest represents only the finest world-class manufacturers, such as Canon, HP, and Sharp and has achieved elite status with each one. That means more buying power and a manufacturer-decorated service department.

**Copiers Northwest** has been built on a service culture second to none. Our technicians average over 22 years in the field. They know how to perform preventative maintenance that limits or completely eliminates the frustration of downtime.

In addition to reliable hardware and experienced, award-winning technicians, **Copiers Northwest** can also provide:

- Software solutions that manage workflow, streamline processes and protect sensitive data
- Interactive whiteboards that incorporate multiple learning features and connect with laptops and mobile devices are also available
- Temperature screening kiosks to make sure your students, faculty, and administrative personnel stay healthy and your school remains open
- Budget-friendly acquisition plans that monitor and control costs
- Document management hardware and software that puts data at your fingertips and reduces the need for filing cabinets and off-site storage

**You deserve the best!** Contact your **Copiers Northwest** Account Representative and ask for a complimentary DocuStudy to determine how you can maximize uptime while lowering costs.
