

Healthcare

We know how to **cure the pain** when it comes to your printing!

Knowledge and Experience

The healthcare industry requires more data, more security and more effective document management than most industries. Due to compliance regulations for HIPPA, Medicare and insurance, healthcare documentation gets more complicated every year. **Copiers Northwest** has the knowledge and experience with healthcare providers to remove the paperwork burden and allow you to spend more time with your patients.

Copiers Northwest's healthcare experts will design and customize hardware and software solutions specific to your hospital, clinic, or medical office. Streamlining communications, improving access to patient files and digitizing accounts payable and accounts receivable allows our healthcare customers more time for better decision-making and improved patient care. It's what we do best.

Document Management

The healthcare industry has evolved to the point that a reliable and secure document management system is essential to effectively compete. Those allowing mountains of paperwork to slow them down will watch others achieve success while they are still searching through antiquated filing cabinets. **Copiers Northwest's** document management specialists, armed with a full range of document storage and retrieval hardware and software, can customize a paperless solution specific to your needs. Now is the time to eliminate unnecessary processes and redundancies that cramp employee productivity, drive up costs and potentially hinder patient-centric care.

Copiers Northwest's document management systems can benefit you by:

- Increasing employee productivity
- Providing more secure compliance
- Accessing patient records quicker
- Remotely accessing critical data
- Creating better cash flow due to faster and more accurate billing
- Eliminating file cabinets and costly off-site storage
- Insuring Disaster Recovery
