

# Transportation

We know how to **take the load off** any document workflow hassles!

## Better Technology Driven Solutions

Most people don't consider the transportation industry as one that can benefit from technology-driven solutions. However, despite thin margins, the industry is under constant pressure to implement higher quality reporting and tracking systems, improve cost efficiencies, and project precise and timely delivery responsiveness. At **Copiers Northwest**, our transportation experts can help you capture, store, and distribute valuable information in real-time and have it at your fingertips.

## With a Copiers Northwest transportation and logistics solution, you can:

- Eliminate time-consuming data entry processes through user-friendly document and imaging workflow solutions
- Scan and capture all inbound shipping documents and share with your employees, customers, and government agencies
- Easily route bills of lading, proof of deliveries, invoices, air waybills, air cargo manifests, and freight bills from your desktop, laptop, or tablet
- Improve supply chain decision-making and support with complete access to distribution-related documents in real-time
- Deploy enhanced document security to prevent unintended access or loss of information from customer files and transportation databases

Contact your local **Copiers Northwest** Account Representative so we can help improve your document workflow and make you more efficient.
