

Government

We can **eliminate printing & document workflow challenges!**

Better Products / Lower Costs

Government agencies deal with reams of paperwork on a daily basis. Helping government employees manage documents while controlling costs is where **Copiers Northwest** excels. Our knowledgeable and experienced government experts have helped agencies of all sizes and geographic locations increase employee productivity and improve communication with each other and their constituents. **Copiers Northwest** provides a variety of governments-centric solutions from our innovative managed print services program; PrintSmart to facilities management where you outsource the entire document production and distribution function to us.

Copiers Northwest understands the unique requirements of the public sector. Budgets need to be maintained regardless of the workload. Communicating information in a timely manner is demanded. Downtime for office technology can never be tolerated or excused. **Copiers Northwest** represents only world-class manufacturers and the most reliable products. We then support those products with a team of service technicians that average 22 years of experience in the field.

Managed Print Services

With **PrintSmart**, **Copiers Northwest** becomes accountable for your entire copier, MFP and printer fleet. After a thorough analysis of your agency's workflow, inventorying makes and models and identifying machine volumes and costs associated with consumables, we make recommendations that save you money and optimize your entire fleet.

PrintSmart from Copiers Northwest can benefit you by:

- Removing the burden of managing copiers, printers, and MFP's from your IT staff
- Freeing up IT staff to focus on more important, strategic initiatives
- Maximizing workflow and improving employee productivity
- Directing print activity away from expensive desktop printers to centralized MFP's
- Not having to stock toner for a variety of manufacturers or obsolete products
- Saving you money!
