

# Production Print

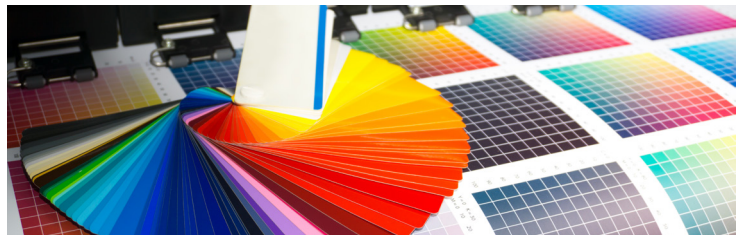

Today's commercial printing environment now allows for the use of high-speed production printers for jobs once reserved for multi-color offset printing presses. These high-performing products have the speed and production quality of the printing presses but don't require lengthy set-up time and are very easy and efficient to operate.

The problem is making sure there's a skilled and reliable service organization standing behind the products...a company that understands not just the complexity of the hardware and software, but one that realizes the importance and timeliness of service. **Copiers Northwest** is better positioned to handle the unique needs of the Production Print industry than any dealer or manufacturer-direct organization in the Pacific Northwest.

At **Copiers Northwest**, we understand that when these products aren't performing to expectations, you're not just losing revenue, you may be losing customers. As one of the largest and most successful office technology providers in the USA, **Copiers Northwest** maintains premier status with the world class manufacturers we represent. This allows for favorable pricing and immediate support if needed. **Copiers Northwest's** technicians average over 23 years in the field, so they know how to perform preventive maintenance to keep your equipment up and running and eliminate the need for emergency service calls.

In addition to representing high speed printers from Canon, Sharp, HP, and Konica Minolta, **Copiers Northwest** also provides a full range of specialty and finishing products to support your business. In addition, our Overflow Print Center can help you to serve your customers with additional equipment to produce items that you may not have the capability to create in house, including:

- G7 Certification
- Large and Grand Format Printers
- CNC Cutter / Routers
- Book Binding Finishers
